

## TIMBER VOLUME IN WISCONSIN 1983

**Jerold T Hahn, Principal Mensurationalist**

**ABSTRACT.**—The fourth inventory of Wisconsin's forest resources shows a 39-percent increase in growing-stock volume between 1968 and 1983, from 11.2 to 15.5 billion cubic feet.

**KEY WORDS:** Timber resources, statistics, growing-stock, sawtimber.

Volume of growing-stock<sup>1</sup> on commercial forest land in Wisconsin increased from 11.2 billion cubic feet in 1968 to 15.5 billion cubic feet in 1983, a 39-percent gain:

Growing stock	Survey year		Change since 1968 <sup>2</sup>
	1968 <sup>2</sup>	1983	
	(Million cubic feet)	(Percent)	
Softwoods	2,519	3,638	44
Hardwoods	8,649	11,860	37
Total	11,168	15,498	39

Softwood growing-stock volume increased by 44 percent; hardwood volume grew by 37 percent.

These volume gains were made in spite of a less than 2 percent increase in commercial forest area. These increased volumes reflect an increase in average growing-stock volume per acre, from 768 cubic feet per acre in 1968 to 1,050 cubic feet per acre in 1983.

Growing-stock volume did not increase uniformly throughout the State (table 1). The largest per unit increase was in the Central Unit, and the smallest

<sup>1</sup>Net volume in cubic feet of growing-stock trees 5 inches d.b.h. and larger from the stump to a variable 4-inch top diameter.

<sup>2</sup>Figures have been adjusted from those published after the 1968 survey to conform to 1983 volumes because of changes in survey procedures and definitions.

increase was in the Northwest Unit. The largest volume is in the Northwest Unit, and the smallest volume is in the Southeast Unit. Figure 1 shows the unit and county boundaries for the five inventory units in Wisconsin.

The aspen species group is the most abundant species group in Wisconsin and accounts for almost 17 percent of the growing-stock volume. Its volume increased by almost 21 percent between surveys. Hard maple—primarily sugar maple—and select red oak—primarily northern red oak—are the second and third most plentiful, each comprising 9 percent of the total. The fourth largest group, red and jack pine, had 8 percent of the volume, a 91-percent increase between inventories. As shown in the following tabulation, other prominent species include the other oaks and the spruce-fir groups:

Species group	Growing stock (Million cubic feet)
Aspen	2,625
Hard maple	1,495
Select red oak	1,420
Red and jack pine	1,299
Other oaks	1,257
Spruce-fir	877
Other hardwoods	5,063
Other softwoods	1,462
Total	15,498

Included in the growing-stock volume are 35.0 billion board feet of sawtimber.<sup>3</sup> The oak groups, select

<sup>3</sup>Net volumes of the saw log portion of live sawtimber trees (softwoods 9 inches d.b.h. or larger and hardwoods 11 inches and larger) from the stump to a point in the central stem at which utilization for sawn products is limited by large branches, forks, or other defects or by a diameter outside bark of 7 inches for softwoods and 9 inches for hardwoods.

Table 1.--Net volume of growing stock in 1968 and 1983 by forest inventory unit and change since 1968, Wisconsin

Forest inventory unit	1968 growing-	1983 growing-	Change since 1968
	stock volume Million cubic feet	stock volume	
Northeast	3,626	4,474	+23
Northwest	3,898	5,311	+36
Central	1,740	2,869	+65
Southwest	1,240	1,936	+56
Southeast	664	908	+37
Total	11,168	15,498	+39

Figure 1.—Wisconsin's five forest inventory units.

red oak, and other oaks have the greatest sawtimber volume, followed by the aspen, hard maple and pine groups rounding out the top five:

<b>Species group</b>	<b>Sawtimber</b> (Million board feet) <sup>4</sup>
Select red oak	4,555
Other oaks	4,049
Aspen	4,041
Hard maple	3,384
Red and jack pine	3,066
Spruce-fir	1,740
Other hardwoods	9,077
Other softwoods	<u>5,122</u>
Total	35,035

The major concentrations of timber are found in the northern part of the State:

<b>Forest inventory unit</b>	<b>Growing-stock volume</b>	
	<b>Softwoods</b>	<b>Hardwoods</b>
		(Million cubic feet)
Northeast	1,424	3,050
Northwest	1,283	4,028
Central	703	2,166
Southwest	92	1,844
Southeast	<u>136</u>	<u>772</u>
Total	3,638	11,860

Northern Wisconsin contains less than 40 percent of the State's land, but more than 60 percent of its growing-stock volume. Bayfield County in the Northwest Unit has the most growing-stock and sawtimber volume of any county in the State, followed by Marinette and Forest Counties in the Northeast Unit (tables 2 and 3). These two northern units contain 72 percent of the State's aspen volume and 60 percent of the pine volume. The Central Unit also has a significant proportion (32 percent) of the State's pine volume.

The sampling error in this inventory was  $\pm 1.05$  percent for the State's 15.5 billion cubic feet of growing-stock material.

This forest inventory was conducted by the North Central Forest Experiment Station, USDA Forest Service. More intensified field sampling was made possible by additional funding provided the North Central Station by the State Legislature through the Wisconsin Department of Natural Resources.

---

<sup>4</sup>International 1/4-inch rule.
