# BIOMASS YIELDS FOR SMALL TREES, SHRUBS, AND HERBS IN NORTHERN LAKE STATES FORESTS

W. Brad Smith, *Mensurationist*

Biomass estimates for small trees, shrubs, and herbs are used in determining wildlife habitat, forest fuel conditions, and successional species occurrence. This paper presents empirical yield information for lesser vegetation in the northern Lake States (fig. 1), based on data from recent field inventories.

All data for this paper were collected by the Forest Inventory and Analysis (FIA) work unit of the North Central Forest Experiment Station. The data are from the 1980 inventory of Michigan (Raile and

Smith 1983), the 1983 inventory of Wisconsin (Raile 1985), and the 1980 inventory of the Superior and Chippewa National Forests in Minnesota<sup>1</sup>. Each forest sample plot for these inventories consisted of 10 points uniformly spaced over 1 acre (Doman *et al.* 1981). At each point, trees 5.0 inches d.b.h. and larger were selected with a 37.5 factor prism. In addition, at the first three points, tree saplings (d.b.h. 1.0 to 4.9 inches) were tallied if they occurred within

<sup>1</sup>Gerhard Raile provided data for analysis.

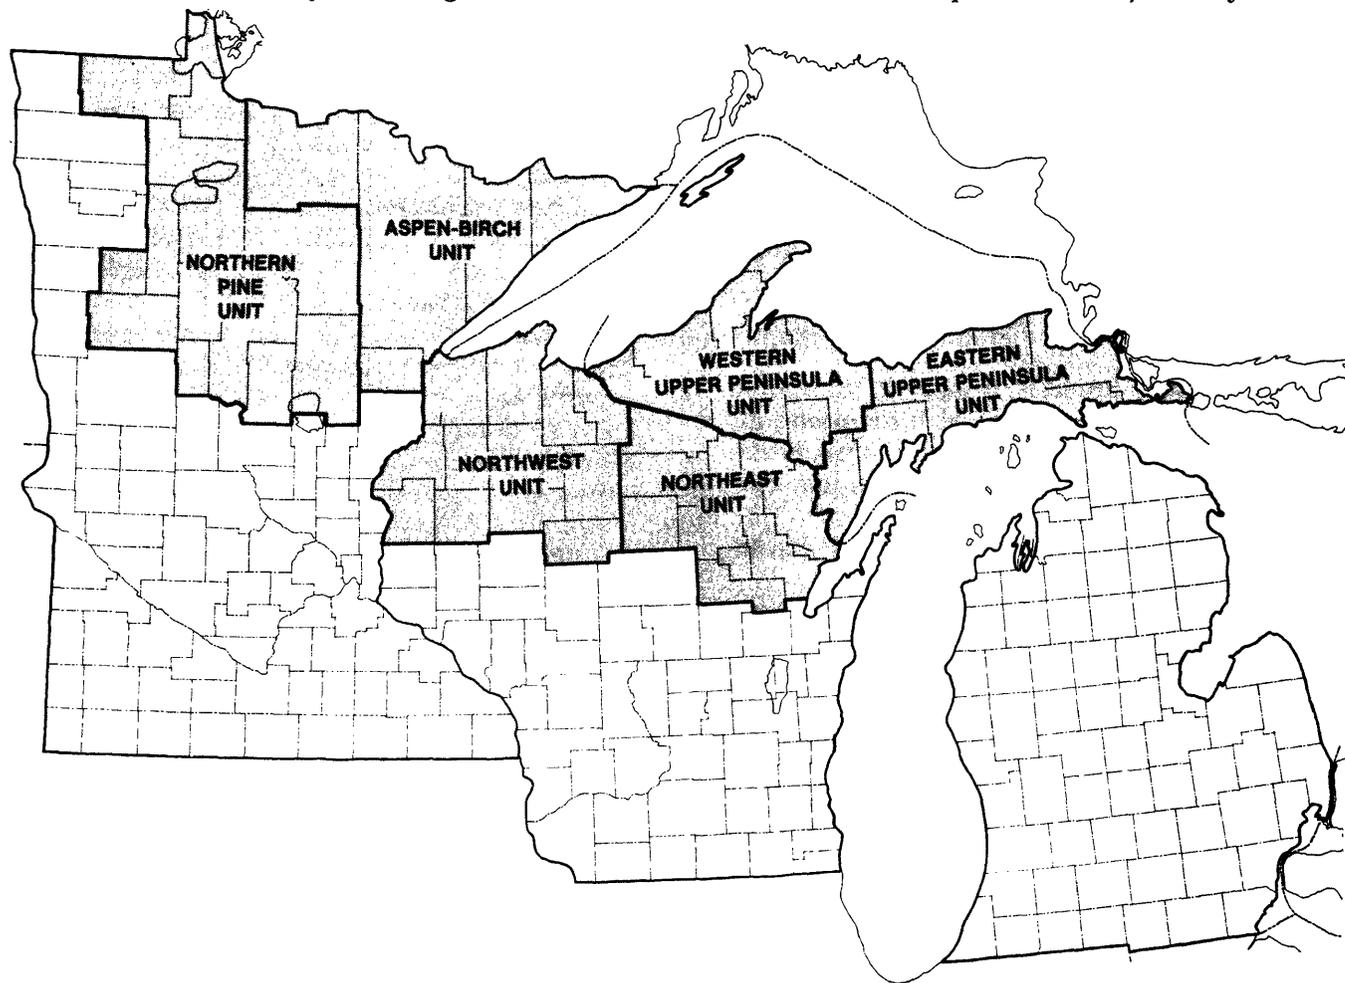

Figure 1.—Forest survey units of the northern Lake States.

6.8 feet of the point (1/300th acre plot). Small trees (less than 1.0 inches d.b.h.) and lesser vegetation were sampled on the northeast quadrant of each of these fixed radius plots.

Shrub species were placed into two categories to facilitate sampling—tall and low shrubs. Tall shrubs (including small trees) were tallied by stem diameter classes. Stem diameters were measured 6 inches above the ground level. The low shrubs (ground cover species) were sampled by visually estimating the percent cover.

Field work was conducted all year; however, consistent data were only available for May through October (Brand 1985). This provided a data base of 4,501 plots across the Lake States.

Biomass was computed using equations summarized by Smith and Brand (1983), and the results are presented in tables 1-4 as yields in green pounds per acre by forest type. Species that did not comprise at least 1 pound per acre were collected into the "other" tall and low shrub categories.

## SPECIES AND SPECIES GROUPS IN THE LAKE STATES<sup>2</sup>

### Commercial trees

Jack pine .....	<i>Pinus banksiana</i>
Red pine .....	<i>Pinus resinosa</i>
White pine .....	<i>Pinus strobus</i>
White spruce .....	<i>Picea glauca</i>
Black spruce .....	<i>Picea mariana</i>
Balsam fir .....	<i>Abies balsamea</i>
Eastern hemlock .....	<i>Tsuga canadensis</i>
Tamarack .....	<i>Larix laricina</i>
Northern white-cedar .....	<i>Thuja occidentalis</i>
White oak	
White oak .....	<i>Quercus alba</i>
Swamp white oak .....	<i>Quercus bicolor</i>
Bur oak .....	<i>Quercus macrocarpa</i>
Select red oak	
Northern red oak .....	<i>Quercus rubra</i>
Other red oak	
Northern pin oak .....	<i>Quercus ellipsoidalis</i>
Black oak .....	<i>Quercus velutina</i>
Hickory	
Bitternut hickory .....	<i>Carya cordiformis</i>
Basswood .....	<i>Tilia americana</i>
Yellow birch .....	<i>Betula alleghaniensis</i>
Hard maple	
Sugar maple .....	<i>Acer saccharum</i>
Black maple .....	<i>Acer nigrum</i>
Soft maple	
Red maple .....	<i>Acer rubrum</i>
Silver maple .....	<i>Acer saccharinum</i>
Beech .....	<i>Fagus grandifolia</i>
Elm	
American elm .....	<i>Ulmus americana</i>
Slippery elm .....	<i>Ulmus rubra</i>
Rock elm .....	<i>Ulmus thomasi</i>
Black ash .....	<i>Fraxinus nigra</i>
White and Green ash	
White ash .....	<i>Fraxinus americana</i>
Green ash .....	<i>Fraxinus pennsylvanica</i>
Cottonwood .....	<i>Populus deltoides</i>
Willow .....	<i>Salix nigra</i>
Balsam poplar .....	<i>Populus balsamifera</i>
Bigtooth aspen .....	<i>Populus grandidentata</i>
Quaking aspen .....	<i>Populus tremuloides</i>

<sup>2</sup>The common and scientific names for tree species are based on Little (1979). The common and scientific names for shrubs are based on Gray's Manual of Botany (1950).

Paper birch ..... *Betula papyrifera*  
Black cherry ..... *Prunus serotina*  
Butternut ..... *Juglans cinerea*

Noncommercial trees and tall shrubs

Striped maple ..... *Acer pensylvanicum*  
Mountain maple ..... *Acer spicatum*  
American hornbeam .... *Carpinus caroliniana*  
Eastern hophornbeam ..... *Ostrya virginiana*  
Pincherry ..... *Prunus pensylvanica*  
Chokecherry ..... *Prunus virginiana*  
Mountain-ash ..... *Sorbus* spp.  
Green alder ..... *Alnus crispa*  
Speckled alder ..... *Alnus rugosa*  
Swamp birch ..... *Betula pumila*  
Dogwood ..... *Cornus* spp.  
Black alder ..... *Ilex verticillata*  
Sweet gale ..... *Myrica gale*  
Witch hazel ..... *Hamamelis virginiana*  
Common ninebark .. *Physocarpus opulifolius*  
Juneberry ..... *Amelanchier* spp.  
Hazel ..... *Corylus* spp.  
Prickly ash ..... *Xanthoxylum americanum*  
Alder buckthorn ..... *Rhamnus* spp.  
Leatherwood ..... *Dirca palustris*  
Viburnum ..... *Viburnum* spp.  
Elder ..... *Sambucus* spp.  
Sumac ..... *Rhus* spp.  
Buffaloberry ..... *Shepherdia canadensis*  
Shrubby willows ..... *Salix* spp.

Low shrubs and herbs

Common juniper ..... *Juniperis horizontalis*  
Yew ..... *Taxus canadensis*  
Virginia creeper ..... *Parthenocissus* spp.  
Labrador tea ..... *Ledum groenlandicum*  
Leatherleaf ..... *Chamaedaphne calyculata*  
Bog laurel ..... *Kalmia polifolia*  
Sweetfern ..... *Comptonia peregrina*  
Gooseberry-currant ..... *Ribes* spp.  
Raspberry-blackberry ..... *Rubus* spp.  
Rose ..... *Rosa* spp.  
Bilberry-blueberry ..... *Vaccinium* spp.  
Bush honeysuckle ..... *Diervilla lonicera*  
Honeysuckle ..... *Lonicera* spp.  
Poison ivy ..... *Rhus radicans*  
Greenbriar ..... *Smilax* spp.  
Bearberry ..... *Arctostaphylos uva-ursi*  
Bog rosemary ..... *Andromeda glaucophylla*  
Grape ..... *Vitis* spp.  
Strawberry ..... *Fragraria* spp.

Smith, W. Brad.

Biomass yields for small trees, shrubs, and herbs in northern Lake States forests. Res. Pap. NC-277. St. Paul, MN: U.S. Department of Agriculture, Forest Service, North Central Forest Experiment Station; 1986. 11 p.

Biomass yield information by forest type is presented for lesser vegetation in northern Michigan, Wisconsin, and Minnesota based on data from recent field inventories.

---

**KEY WORDS:** Green weight, lesser vegetation, forest inventory.
